SECRETARY

Dear Ms. Salas,

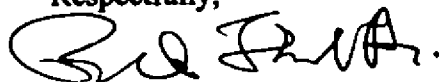

CP06-54

2006 NOV -7 P 12:32

FEDERAL ENERGY
REGULATORY COMMISSION

I am writing you to express my deep concern for our environment and what I feel will only harm it further. As a lifelong Long Islander, I am very aware of the changes that have occurred in my lifetime alone. Unfortunately these have not been positive environmental ones. Broadwater would only be another potential assault on the Sound. The cost, both financially and to our Long Island environment are too great. We have already seen a drastic decrease to the wildlife on Long Island. The bird and fish populations would be negatively impacted, as well as the families who enjoy spending meaningful recreational time on the water. I hope that you do not standby and contribute to the destruction of a constantly shrinking area.

Respectfully,

RICH FISHETTI
